This application has been transferred to AU 1616 to a different examiner. After reviewing the file history, office action mailed 7/11/06 is vacated and an election requirement is set forth below.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

a) aminophosphate or aminophosphonate herbicide, b) alkylbetaines or alkyl(amidoalkyl)betaines and c) alkylmonoglycoside or alkylpolyglycoside.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims are to the genus of species.

The following claim(s) are generic: 16-20,27-31.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Since the claims are to the genus rather than to the species. For this reason the technical feature changes with the actives in the composition. Thus the actives vary therefore the technical feature will vary.

A telephone call was made to Attorney Seugent on 4/13/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1616

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

In addition, Applicant is being requested to elect a specifically named or completely defined a) aminophosphate or aminophosphonate herbicide, specifically named or completely defined b) alkylbetaines or alkyl(amidoalkyl)betaines and specifically named or completely defined c) alkylmonoglycoside or alkylpolyglycoside. If additional components (usually listed in further comprising claims) are desired for this invention, Examiner is requesting that all additional components be specifically named or completely defined. Claims comprising additional ingredients which are not specifically named or completely defined will be considered non-elected.
